SPECIFICATIONS

M55F

Industrial 4WD tyre with strong puncture-resistance

It's time for a change

Toyo Tires enables you to move better; our Japanese roots gives you the latest in mobility both on and off the road. But that's just the beginning. What Toyo really does is empower you to move confidently to new and bigger things, to make a change for the better. Just ask those who have. You see, tyres are not just a part of your vehicle. We believe that what you put on the outside of your car, matters to those on the inside. This is why we make **tyres for drivers**, not cars.

Make your *move*.

TOYO TIRES®

Keep moving with the **M55F**, an extreme-duty all-terrain tyre that's designed for the harshest conditions Australia has to offer, making it popular in severe-service mining, prospecting, remote exploration, military applications, 4x4 overlanding and even as a robust off-road trailer tyre. Offering the versatility of an all-terrain tyre with incredible durability to back it up, this reliably rugged, industrial 4WD tyre is as tough as it gets, ready to roll over sharp rocks for days on end or travel flat-out on long, rough roads through remote regions where failure is not an option.

Key driver benefits

- Off-road traction
- Puncture resistance
- Durability
- Tread life

Suitable fitment

- Toyota Landcruiser Commercial
- Toyota Prado
- Ford Ranger

Features & Benefits

Aggressive block and lug tread pattern

Maximum traction for dirt, sand and field work. Self-cleaning for wet and muddy conditions

Wide tread with square shoulders

Excellent handling response with high speed stability and comfort

Wide steel belts and robust casing construction

Increased puncture resistance and longer tread life

Chip, cut and wear resistant tread compound

Long tread life and resistance to tread cutting and chipping, even in harsh conditions

Related Product Comparison

In comparison to **M55F**

Open Country A/T II

- ⬆ better sealed road performance
- ⬆ better fuel economy

similar off-road traction

Open Country R/T

- ⬆ has stronger off-road traction
- ⬆ is more puncture resistance

similar puncture resistance

Open Country M/T

- ⬆ more off-road traction
 - ⬇ less cut/chip resistance
- similar comfort

"We covered 600km on off-road tracks extremely well known for sidewall stakes. There were no punctures in the M55's" – Chuck Thomas, Chuck It In Low Range
